DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 17-22 and 28 have been considered but are most in view of the new ground(s) of rejection.

Claim Objections

2. Claim 20 is objected to because of the following informalities: buckminsterfullerene is incorrectly spelled "buckministerfullerene." Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 18 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 5. Claim 18 recites the limitation "the insulating substrate" in line 1 of the claim.

 There is insufficient antecedent basis for this limitation in the claim.
- 6. Claim 19 recites the limitation "the insulating substrate" in line 1 of the claim.

 There is insufficient antecedent basis for this limitation in the claim.

Application/Control Number: 10/033,743 Page 3

Art Unit: 2826

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 8. Claims 17, 21, 22, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Dodabalapur et al. (USPN 5,596,208).
- In reference to claims 17, 21, 22, and 28, Dodabalapur et al. (USPN 5,596,208, 9. hereinafter referred to as the "Dodabalapur" reference) discloses a similar device. Figure 2 of Dodabalapur discloses a field effect transistor with a semi-transparent gate electrode (14). There is an electrically insulating layer (15) with a first side and a second side on the gate electrode (14). The first side is adjacent to the gate electrode (14). A semiconducting polymer layer (16) is formed on the second side of the gate electrode (14). Dodabalapur discloses that the semiconducting polymer layer (16) can be poly (3-octylthiophene) as well as poly (3-hexylthiophene). The manufacturing process used to produce the device of figure 2 inherently meets the fabrication method of described in claims 17, 21, and 22. As for the claimed use (the term "photosensing" organic field effect transistor" and claim 28), a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention. and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a

manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Therefore claims 17, 21, 22, and 28 are not patentably distinguishable over the Dodabalapur reference.

Allowable Subject Matter

- 10. Claim 23 is allowed.
- 11. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 12. The following is a statement of reasons for the indication of allowable subject matter: the examiner is unaware of any prior art which suggests a method of fabricating a photosensing organic field effect transistor with the exact semiconducting polymer layer and its specific dopants as suggested by the applicant.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Quinto whose telephone number is (571) 272-1920. The examiner can normally be reached on M-F 8AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
